

## EcoLaser

This laser has been specially modified to emanate high intensity levels of the Centering Vibration and all 12 Beneficial Bands of the Vibrational Spectrum (see our Online Series Vibrational Testing and Healing for more information on these Vibrational Qualities). The EcoLaser offers an extremely fast, powerful, and easy way to energetically Clear, Charge, and Balance any material with beneficial vibrations.

Dimensional Design's proprietary, permanent encoding of these vibrations into the laser light sets the EcoLaser apart from other lasers on the market. It is also a fraction of the cost of other vibrational lasers on the market, which often have a starting price well in excess of 3000 U.S. Dollars.

### **A truly unique energy laser**

Other lasers simply can't do what the EcoLaser can, thanks to its advanced technology and proprietary programming. And the EcoLaser never emits harmful electromagnetic radiation fields like so many other lasers on the market. What's more, the EcoLaser light is permanently imprinted and cannot be weakened, altered or neutralised.

WOW—that's all I can say about the EcoLaser. The first time I used it, I felt this profound sense of relaxation and overwhelming peace. I'm a professional Feng Shui practitioner, so my everyday use for the laser is in my work in people's home to create a higher layer of balance and flow. But frankly, I take this product to restaurants, theatres, to sick friends' homes—with such powerful balancing and life enhancing effects, the uses are unlimited.

~ Jim Braken Feng Shui consultant, Chicago, IL

### **Clears Balances & Imprints Energetically**

The laser beam carries energetic qualities that have amazingly enhanced healing properties for the environment. This laser is designed to neutralise the negative effects of chaotic energy fields and restore balance and

harmony. As the light is projected onto areas it clears toxins and imprints the area with life enhancing colour qualities that restores balance to the area within minutes.

The laser has 5 interchangeable tips for specific clearing applications. Each tip has been encoded and carries a specific geometric pattern and energy quality.

### **5 Focusing Tips (included with the EcoLaser)**

**5 FOCUSING TIPS** let you customise the EcoLaser for different types of jobs and treatments. Each of the 5 interchangeable tips has specific clearing applications, and each tip has been encoded and carries a specific geometric pattern and energy quality.

## **Circle Pattern**

Clears disharmonious etheric or subtle energy patterns from any area. This light will brighten any area where energy has stagnated and become "heavy or dark". Very effective for clearing stagnant energy fields from residue of negative psychological or emotional patterns.

## **Cross Pattern**

Clears any toxic imprinting from physical materials. This is the most commonly used tip. When in doubt about what tip to select this is a good standard for most applications. The cross pattern will clear toxic encoding from walls, floors, furniture, clothes, beds, metal furniture or objects, paper and books, etc.

## **Line**

The line is useful for any horizontal or vertical areas that have energetically stagnated. Useful for clearing toxicity from 90 degree angles in rooms, corners, etc.

## **Point (Starburst)**

Focuses maximum intense light on specific smaller areas or objects that need clearing.

## **Arrow**

Directs the flow of energy into or away from a specific area. Pointing the arrow on the stagnant area simply move the arrow in the appropriate direction.

## 144 Horizontal And Vertical ECO Laser Inserts

This insert tube for the EcoLaser contains the combined vibrational information of all 144 beneficial qualities of the Vibrational Spectrum. It provides a composite vibration, from which any living system can extract which ever aspects they are in need for balancing.

Since these vertical waves are associated with a wide range of problems in living beings (at all levels including physical, energetic, emotional, mental,

etc.) use of the 144 Antidote Insert tube for the EcoLaser is a quick and easy general application which is helpful in many different situations.

### **Suggested Uses:**

For all of the below methods, test the subject while applying the method in question to ensure this will help balance their energetic field.

- 1.** Put the selected Insert tune into the EcoLaser and beam the pattern into a glass of water or juice; its vibrations will then be transferred into the body when the person drinks.
- 2.** It can also be used to beam any material a person will be using. Examples include putting it under a poultice to infuse it before using it on the body, on supplements, etc. The EcoLaser is a great tool to infuse into materials including fabric due to its high penetrating power and intensity.
- 3** Be sure to test the person energetically to see if it is beneficial, and check in intermittently to see if the person has had enough and it should be removed (this is a very high amount of vibrational information for some people, although other people can wear the energy pattern happily for long periods of time.)
- 4.** Test to see if there is a stronger effect with just one of the two insert tube for the EcoLasers or both together. If you choose to beam both into water beam the patterns into 2 separate glasses and drink the 144 Antidote pattern first.

## 64 Minerals/ DNA Hologram Laser Insert

Core health patterning for all living things! Bring healing and balancing energy to pets, plants, water, food and any other bio-system. Feeling stressed? Beam the EcoLaser with 64-Mineral Tip into your bathwater for super relaxation.

The 64 Mineral insert's hologram is imprinted with the energy of the 64 minerals that represent the basic components of health at the genetic level. The energetic formulation of the imprinted minerals is based on the research of Richard Olree, a genetic pioneer who showed that there are 64 specific minerals that are extremely important, if not essential for creating balance. The laser light acts as a carrier wave for this complex pattern. The area that is being treated absorbs the specific mineral pattern that is needed based on the principle of resonance.

## GeoResonator Laser Insert

Intensified balancing for the natural world! Like light food for flora and fauna of all kinds! Treat outdoor environments (or indoor houseplants). The GeoResonator tip on the EcoLaser also makes a great pairing with GeoResonators, supporting and amplifying their effect. The Safe Space GeoResonator pattern is imprinted into a hologram inside this metal tube. It is designed to be inserted into the EcoLaser to amplify the effect of the GeoResonator energetics into the environment. When the laser light shines

through the tube it carries the imprinted wave pattern of the GeoResonator to the area being treated. To help balance environmental areas the laser can be directed onto soil, plants, trees, water, gardens etc. It can also be used on indoor plants to help keep them healthy and strong.

### **Use**

Unscrew the selected tip of the EcoLaser and drop either end of the metal tube into the body of the laser. Screw the tip back onto the EcoLaser before using. Any of the tips can be used with the GeoResonator Energy Tube.

Energy testing can be used to indicate the optimum time. Do not hold the laser over an area for more than a minute at a time. The area often corrects in under 20 seconds.

The GeoResonator emission contains several harmonising and resonant patterns that positively influence the environment, including:

- Full Colour spectrum that supports life processes
- Energy imprints of 64 minerals – the core DNA building blocks
- Geomagnetic earth pattern to balance the soil and land
- Patterns to support atmospheric balance

## Vital Cell Laser Insert

The Vital Cell pattern is imprinted into a hologram inside this metal tube. This insert tip when combined with the light of the Eco Laser delivers information to the body's cells that helps to correct and harmonise "disturbances". This vibrational information assists in the energy metabolism of the body at a cellular level; helping to establish proper cellular functioning and energy flow. New cells come in at a higher rate of vibration and old abnormal cells fall away. The Vital Cell is designed to help improve energy and alleviate fatigue.

## Clear & Restore Laser Insert

The Clear and Restore pattern can be used to support and quicken the balancing effect of a broad range of healing modalities. It can be very helpful between and treatment to assist and amplify the correcting of energy imbalances.
